Art Unit: 1731

1. Claims 11 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 11 and 12 are dependent on cancelled claim 9.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,7,8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Boecker et al. (4,693,988).

Boecker et al. teaches forming a mixture of : silicon, silicon carbide and thermoset binder (e.g. phenolic resin); compression molding the mixture; and firing the molded mixture to carbonize the binder and react the carbon with silicon. Note that although Boecker et al. recites firing at a high temperature to sinter the SiC, the fired body would pass through the claimed temperature ranges and the recited reactions would take place as taught by Boecker et al.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1731

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fitchmun (3,947,550) in view of Arai et al. (6,401,799).

Fitchmun teaches the basic claimed process of manufacturing a silicon carbide structure.

Fitchmun does not disclose that the mixture is molded by compression molding. Instead, Fitchmun teaches molding by injection molding.

Arai et al. discloses that compression molding and injection molding are equivalent processes for molding powder/thermoplastic binder compositions. See col. 12, lines 50-61. It would have been obvious to one skilled in the art at the time of the invention to mold the mixture of Fitchmun by compression molding in view of the teaching in Arai et al. that these molding techniques are equivalent.

7. Claims 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fitchmun (3,947,550) in view of Arai et al. (6,401,799) as applied to claims 1-12 above, and further in view of Dubots (5,460,759).

Art Unit: 1731

Dubots discloses pore forming and organic fiber additives in the claimed amounts for modifying the properties of a silicon carbide body. It would have been obvious to include these additives in the process of Fitchmun to obtain the recited advantages.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
